Farbe / Colour

LBOARD A300 RIVA

Dynamic safety sign (DSZ), on one side made of powder-coated sheet steel in white for dynamic (direction-variable) escape routing.

The DSZ can be used for ceiling mounting or by means of an optionally available wall adapter for wall parallel mounting.

The DSZ is capable of displaying two different states (escape sign and blocking).

The direction of the rescue sign is selectable and must be specified separately when ordering.

The blocking sign is a fixed component of the pane and cannot be deselected.

Technical specifications

Visibility distance	30 m
Connecting terminals Net	3 x 2.5 mm ² for double assignment
Connecting terminals RIVA	2 x 1.5 mm ² for double assignment
Casing/colour	Sheet steel, white other colours available on request
Type of assembly	Ceiling mounting, wall parallel mounting
Dimensions (W x H x D)	350 x 253 x 46 mm (Ceiling) 350 x 277 x 48 mm (Wall)
Protection class	IP40
Safety class	I

■ Luminaires for central battery systems

Illuminant	1.5W LED-bar
Light current mains operation	190lm
Power consumption	5VA
Battery current input	12mA
Voltage supply	230V 50/60Hz / 220V DC +25/-20%
Temperature range	-10°C to +40°C
optional:	
Multi-switch and monitoring module	ELC, MSÜ3 SET009, SET010

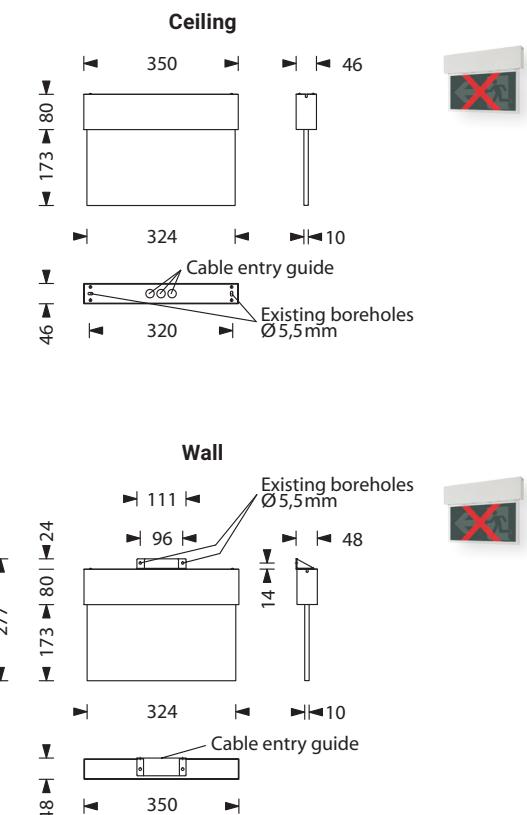

Accessories

Chain assembly set	
Central pendulum	
Wire guard	
Cable assembly set	
Wall adapter, white	
Wall adapter (surface-mounted) with cable cut-out, white	
Wall bracket, white

* 1 pictogram included in the delivery.
Please specify when ordering.

The DSZ (LBOARD A300 RIVA) enables dynamic escape routing (DFWL). The DSZ is used for evacuation from a dangerous area into a safe area.

Escape route clear

Escape route blocked

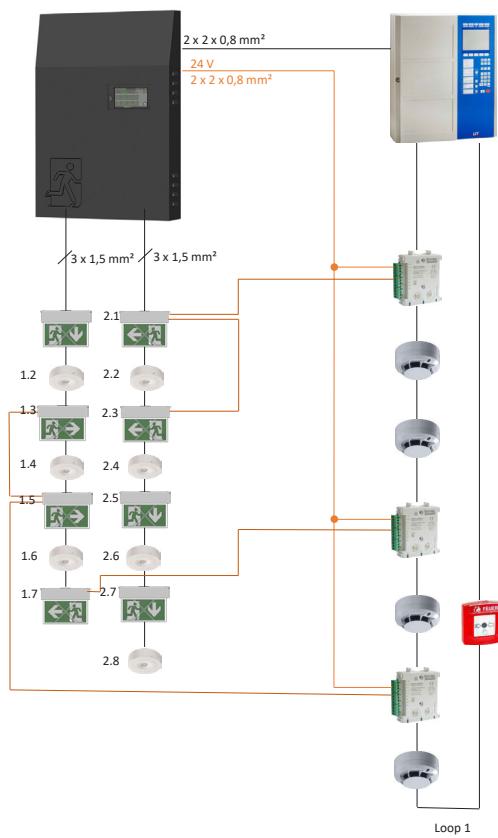

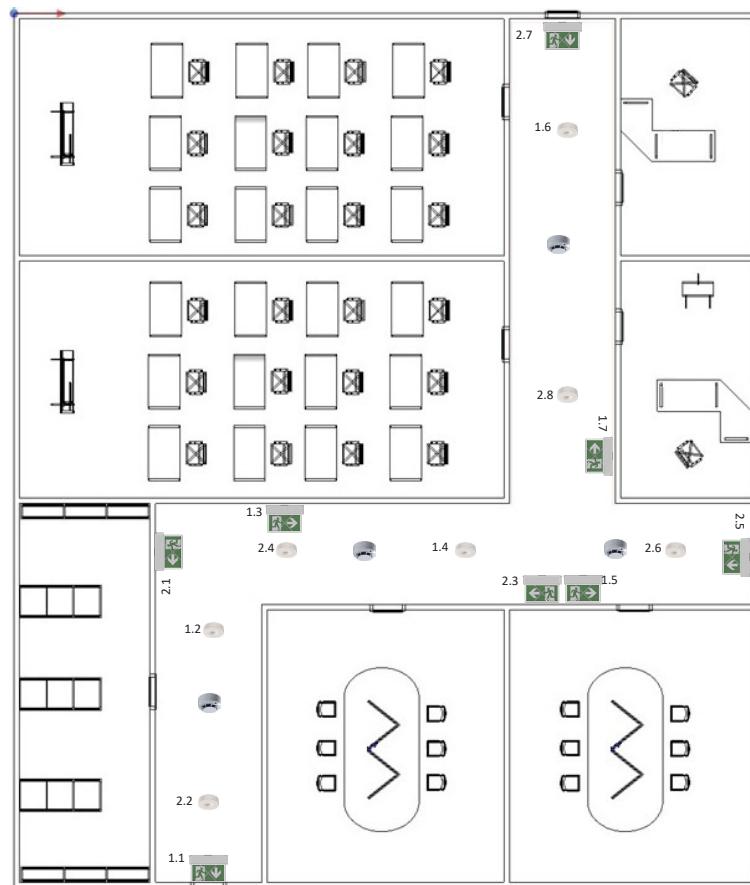

The escape and rescue route is blocked with a red „X“, whereby the escape sign is not backlit. Different operating modes can be set on the DSZ, for example a static or flashing red „X“.

Modes of operation:

How can RIVA luminaires block escape/rescue routes in conjunction with a fire alarm system?

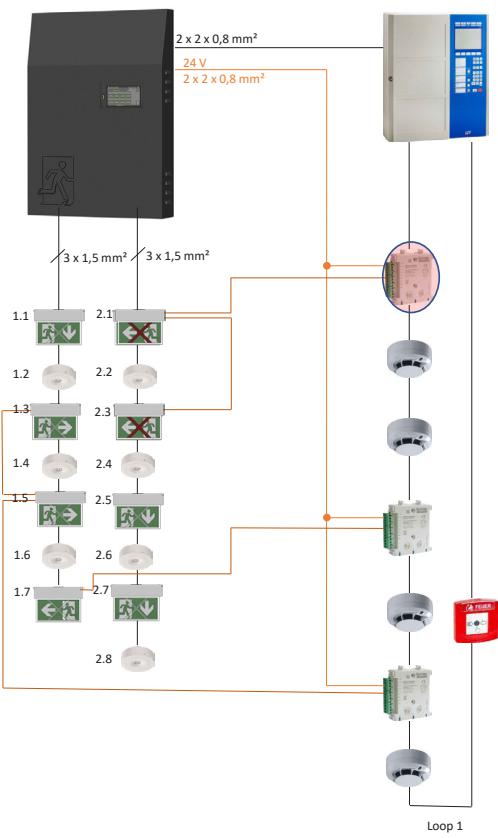

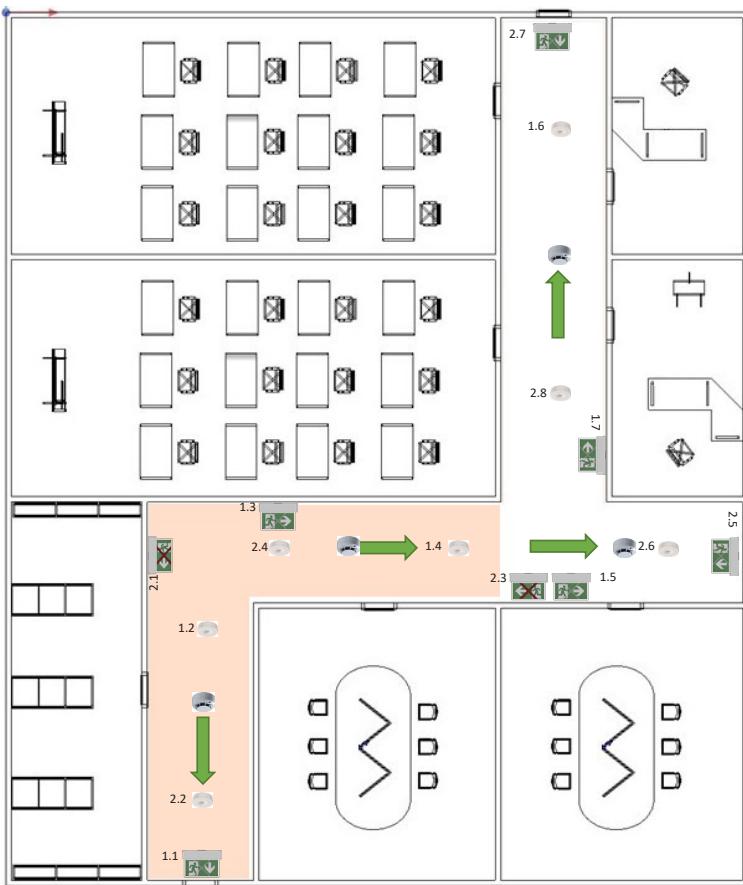

Normal state: No danger ⇒ All routes unblocked

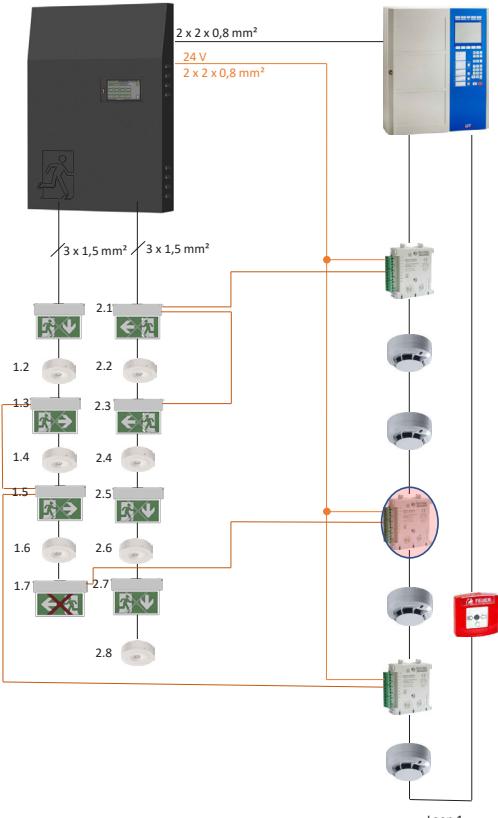

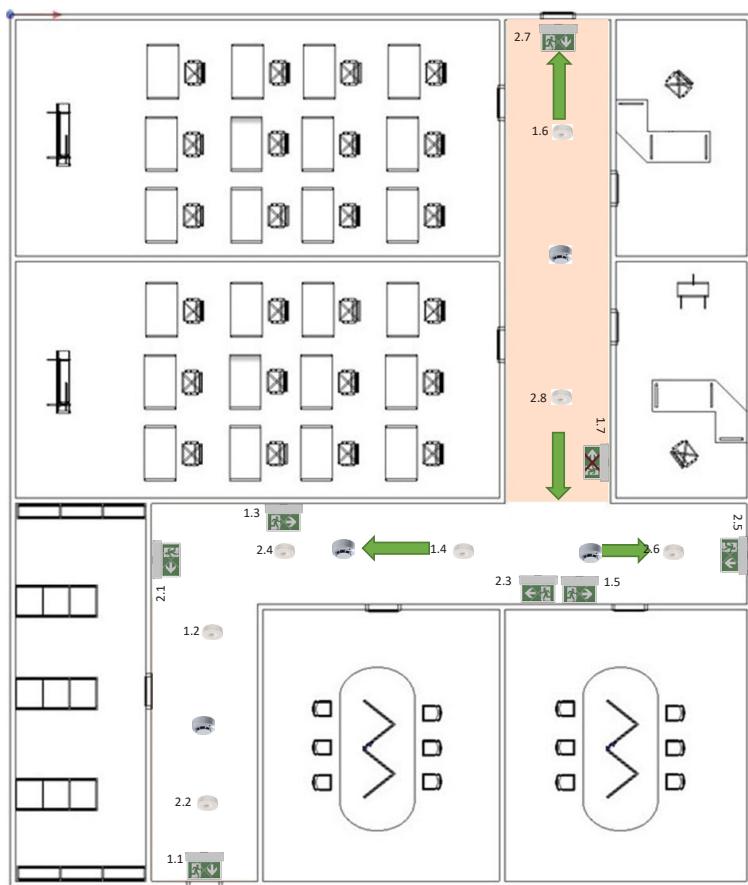

Technische Änderungen vorbehalten / Technical changes reserved

Continued on next page

Scenario 1: Fire in area A ⇒ Fire alarm system gives control signal to rescue signs 2.1 and 2.3 and blocks (red X) so that no persons run into or through the dangerous area

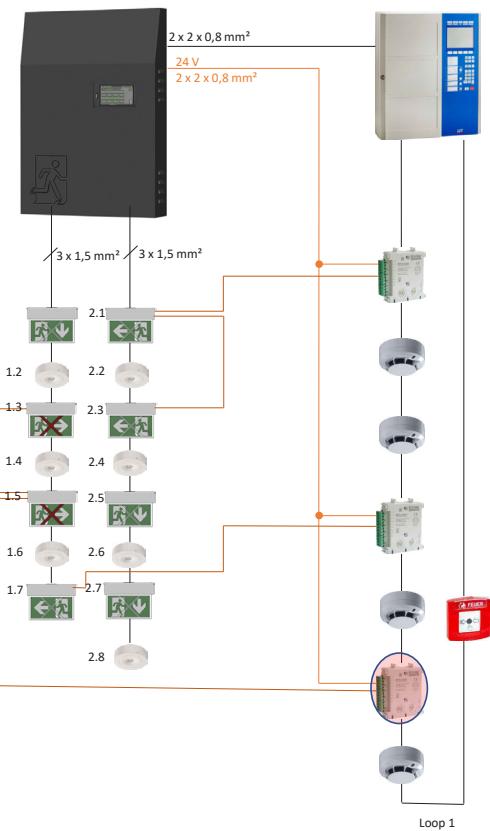

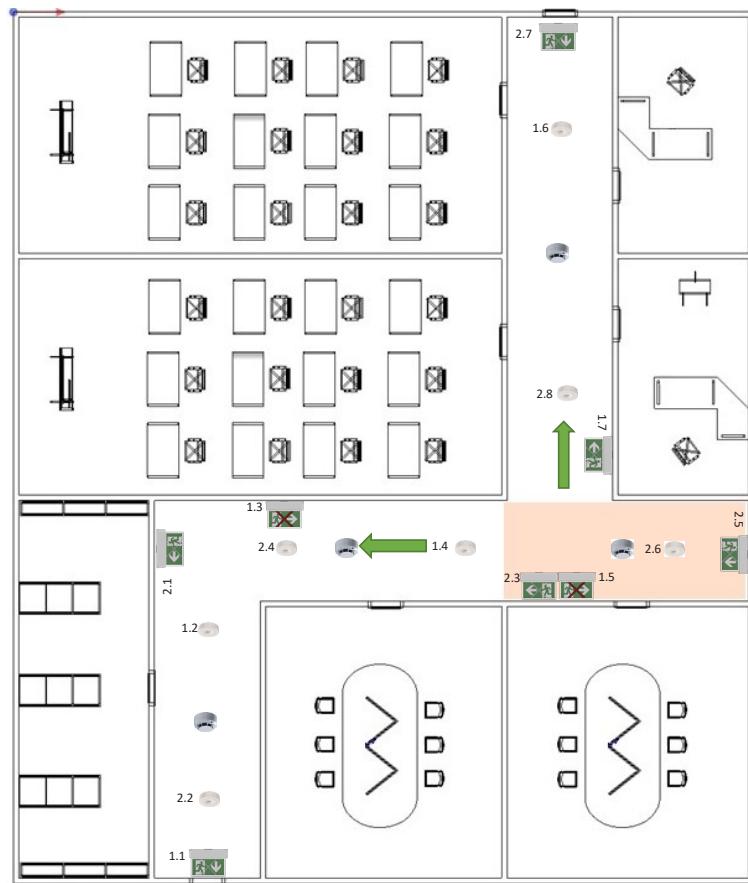

Scenario 2: Fire in area B ⇒ Fire alarm system gives control signal to rescue sign 1.7 and locks (red X) so that no persons can run into the dangerous area

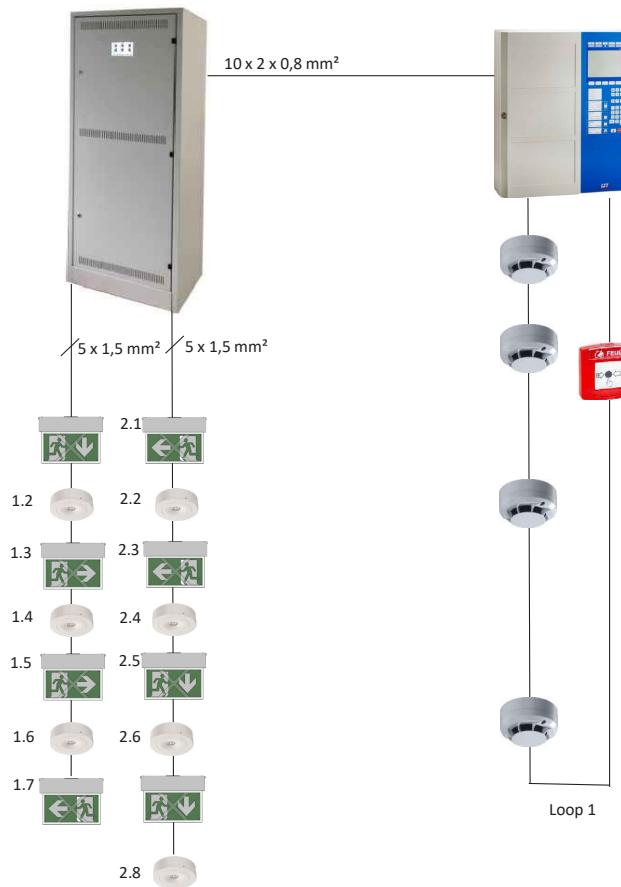

Technische Änderungen vorbehalten / Technical changes reserved

Continued on next page

Scenario 3: Fire in area C ⇒ Fire alarm system gives control signal to escape signs 1.3 and 1.5 and blocks (red X) so that no people run into or through the dangerous area

Connection diagram (example): RIVA luminaires in connection with fire alarm system and CPS/LPS

NOTE:

The exact wiring diagram must be requested from the manufacturer of the fire alarm system or CPS / LPS-System
